

Building Trust and Transparency in AI and Medical Communication in Africa and Europe

Moderators: Akin Odebunmi (University of Ibadan) & Luca Forgone (University of Naples)

Tunde Adegbola

Executive Director of the African Languages Technology Initiative, Ibadan, Nigeria and lecturer in computational linguistics at the University of Ibadan

His research interests lie at the intersection of Artificial Intelligence, Information Theory and Linguistics, where he investigates the exploitation of tonality and other features of African languages in Speech Technologies and Telecommunications. He has also addressed the inadequacies of popular stemmers and lemmatizers in addressing some of the most highly productive morphological processes of African languages.

Lorenzo De Stefano

Affiliate Researcher in Theoretical Philosophy at the University of Naples "Federico II".

His work explores Heidegger, Nietzsche, Anders, technology, ecology, and the philosophy of the digital and AI, with publications in leading journals. He authored *Tra cielo e terra: Eugen Fink e l'interpretazione dei presocratici*, serves on the editorial board of *Mechane*, and is a member of the Italian Society for the Philosophy of Technology, ESA, and SPT. He has also been a visiting researcher at TU Dresden, the Husserl Archive Freiburg, the University of Tübingen, and the Eugen Fink Research Center in Mainz.

11th June 2025

12–1 PM GMT (1-2 PM CET)
